

Power Up GasMaxx™ is Specifically Engineered to:

- **Restore Engine Power**
- **Improve Fuel Economy**
- **Clean Fuel System in One Application**
- **Avoid Costly Repairs**
- **Stabilize Fuel (for stored fuel)**

GasMaxx™ completely cleans & lubricates your fuel system. The superior cleaning ability of GasMaxx™ not only helps maintain your vehicle's performance but it is also a one-tank complete fuel system cleaner that cleans as you drive, resulting in:

Less Time and Money at the Pump.

Restore Engine Power

Power Restoration Testing showed that one-tank cleaned up 61% of intake valve deposits. It also restored lost power in CRC (Coordinating Research Council) cold start and warm-up cycle tests and reduced misfires.

Clean Fuel System in One Application

Fleet Tests show positive results on 7 out of 7 vehicles, representing a cross-section of popular SUVs, foreign cars, US midsize and large US cars with mileage of 80,000 to 120,000 kilometers.

Fuel Injector Clean-Up: Can return fouled injectors to greater than 95% flow.

Intake Valve Deposit Clean-Up: Significantly eliminates intake valve deposits.

Combustion Chamber Deposit Clean-Up:

One tank can clean over 60% of the combustion chamber deposits.

Improve Fuel Economy

Power Up GasMaxx™ completely cleans & lubricates fuel systems. A clean fuel system runs more efficiently, resulting in improved fuel economy.

Avoid Costly Repairs

Maintaining a clean & efficient fuel system is essential to avoiding unnecessary wear and eventual repairs.

" I drive a 2007 Honda Civic sedan and I typically get around 25mpg within the city. The best highway mileage I've ever recorded was 32mpg.

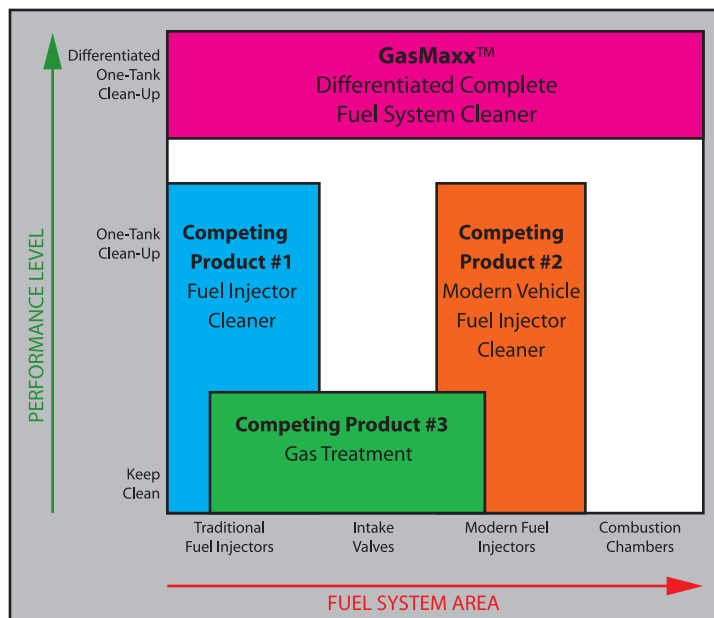

On a recent roadtrip into the rockies, I decided to try a bottle of Power Up GasMaxx™. I kept my fuel receipts and tracked the exact distance that I had driven. I had a hunch that my mileage had improved, but didn't realize how dramatically it had improved until I sat down and did some calculations."

The math was quite simple:
I drove 459 miles on 11 gal of fuel
 $459 \div 11 = 41.7 \text{ mpg}$

The best highway mileage I had ever recorded was **32mpg.**
That's an improvement of nearly 10mpg!! (Or 28%)

- Andrew Arbutnott, Calgary AB

APPLICATION:

The add ratio is 0.43% per volume. 1oz. treats 1.5 to 2 gallons of gasoline. Due to the high potency and high quality detergent that is used, it doesn't need to be used every tank. One bottle will treat your fuel for 5,000 kms.

Power Up GasMaxx™ is available in the following sizes:
355ml - One Shot Bottle
